

## SixSq announces five new App vendors joining Nuvla.io 'App Vendor Programme'

**Geneva, 13 June 2022.** - Ekinops (Euronext Paris - FR0011466069 – EKI), a leading network access and virtualization specialist, today announced the first five new application vendors joining their recently launched Nuvla.io App Vendor Programme built by SixSq to accelerate the delivery and monetization of edge computing applications.

SixSq's Nuvla.io is a proven B2B digital platform for industrialization and automation of containerized edge applications and device management. Nuvla.io enables, among other things, the deployment of these applications on the Ekinops OneAccess branded network equipment.

The first selective innovative vendors bring turnkey apps in their fields:

- [ClearBlade](#): Logistics and railway
- [Cybus](#): Manufacturing and machine monitoring
- [C2RO](#): The leading global provider of GDPR-Compliant AI-SaaS Video Analytics
- [AI EdgeLabs](#): Cyberattack detection driven from AI analysis
- [Securaxis](#): Smart city audio based real-time analysis using AI

App vendors wishing to join the App Vendor Programme are invited to get in touch with the SixSq team.

Details of the App vendor programme can be found here: <https://nuvla.io/marketplace>

### About SixSq

SixSq is a leader in edge computing B2B SaaS. The team is based in Geneva, Switzerland, and embraces the Swiss ideals of excellence, innovation and precision. Nuvla.io, the company's edge-to-cloud B2B management platform and marketplace, allows customers to deploy a secure and comprehensive edge and cloud strategy, while avoiding lock-in. The NuvlaEdge software turns any x86 or ARM hardware platform into a smart edge device connected to Nuvla.io to deploy applications in a range of sectors. The result is a secure edge-to-cloud solution that is application centric, hardware agnostic, cloud neutral and container native.

SixSq is part of the Ekinops group, a leading network equipment and solutions provider.

## **About EKINOPS**

Ekinops is a leading provider of open, trusted and innovative network connectivity solutions to service providers around the world. Our programmable and highly scalable solutions enable the fast, flexible, and cost-effective deployment of new services for both high-speed, high-capacity optical transport as well as virtualization-enabled managed enterprise services. Our product portfolio consists of three highly complementary product and service sets: EKINOPS360, OneAccess and Compose.

EKINOPS360 provides optical transport solutions for metro, regional and long-distance networks with WDM for high-capacity point-to-point, ring, and optical mesh architectures, and OTN for improved bandwidth utilization and efficient multi-service aggregation.

OneAccess offers a wide choice of physical and virtualized deployment options for Layer 2 and Layer 3 access network functions.

Compose supports service providers in making their networks software-defined with a variety of software management tools and services, including the scalable SD-WAN Xpress and SixSq Edge-to-Cloud solutions.

As service providers embrace SDN and NFV deployment models, Ekinops enables future-proofed deployment today, enabling operators to seamlessly migrate to an open, virtualized delivery model at a time of their choosing.

A global organization, Ekinops (EKI) - a public company traded on the Euronext Paris exchange operates on four continents.

Name : Ekinops
